Authorization for this examiner's amendment was given in a telephone interview with Leo Jennings on 6/25/10.

2. The application has been amended as follows:

Amendments will be made referring to claims filed on 6/11/10. Please amend claims 1, 13, 16, and 18-20 as follows:

Claim 1:

On [lines 13-15] of the claim, please change "each item in said MLC list shows an association between an outside link bundle and a corresponding outside node group, the outside link bundle comprising one or more direct connections" to --each row in said MLC list shows an association between one of the outside link bundles and a corresponding one of the outside node groups, each outside link bundle comprising one or more direct connections--.

Please replace Claim 13 with the following:

A method of using a modified graphical user interface (GUI) adapted to reduce the cluttering of icons on a map of interest, the method comprising:

whenever a network device has direct connections to a plurality of groups of outside network devices external to said map, bundling said direct connections between said network device and each of said plurality of groups of outside network devices external to said map into an outside link bundle;

grouping said outside link bundles for said network device into a multiple link connector (MLC);

associating an MLC icon with said MLC, wherein said MLC icon is displayed on said map and is attached to said network device;

selecting said MLC icon on said map to obtain a multiple link connector (MLC) list, each row of said MLC list showing an association between one of said outside link bundles and a respective one of said plurality of groups of outside network devices, each outside link bundle comprising one or more direct connections, wherein each said outside link bundle is displayed on said MLC list using an interactive outside link widget and each said group of outside network devices associated with said respective outside link bundle is displayed using an interactive group identification widget.

Claim 16:

On *[lines 1-3]* of the claim, please change "For a GUI of a communication network, a computer-readable medium embodying a comprehensive network map illustrating all outside link bundles to a plurality of network devices external to said map,

comprising:" to --A computer-readable storage medium encoded with instructions for a GUI of a communication network embodying a comprehensive network map illustrating all outside link bundles to a plurality of network devices external to said map, comprising:--.

On [line 4] of the claim, please change "the context" to --a context--.

On [line 5] of the claim, please change "associated to" to --associated with--.

On [line 9] of the claim, please change "displaying said MLC list" to --displaying said MLC list responsive to selecting said button--.

On [lines 9-12] of the claim, please change "list displays one of said outside link bundles and said group of outside network devices to which said outside link connects, said one of said outside link bundles comprising a plurality of direct connections between the network device and said group" to --list displays an association between one of said outside link bundles and one of said groups of outside network devices to which said network device connects, each of said one of said outside link bundles comprising a plurality of direct connections between the network device and a respective one of said groups of outside network devices--.

Claim 18:

On [line 1] of the claim, please change "computer-readable medium" to --computer-readable storage medium--.

Claim 19:

On [line 1] of the claim, please change "computer-readable medium" to --computer-readable storage medium--.

On [line 2] of the claim, please change "said group" to --one of said groups--.

On [line 3] of the claim, please change "said outside link widget" to --one of said outside link widgets--.

Claim 20:

On [line 1] of the claim, please change "computer-readable medium" to --computer-readable storage medium--.

On [lines 2-3] of the claim, please change "a sub-map of said group displayed on said map upon selection of said group identification widget" to --a sub-map of one of said groups displayed on said map upon selection of one of said group identification widgets--.

Allowable Subject Matter

3. Claims 1, 3-5, 13-16, 18-21, and 23 are allowed.

4. The following is an examiner's statement of reasons for allowance:

Examiner has carefully considered independent claim 1. Regarding independent claim 1, the closest prior art Gauvin et al (U.S. Patent No. 7,315,985 B1) discloses an element database that contains element definitions corresponding to various manageable elements [column 13, lines 29-50]. A resource manager performs

processing and provides a network topology view [column 11, lines 34-45]. Elements have a parent-child relationship [column 16, lines 35-56]. A hierarchy of icons is displayed corresponding to the elements displayed in the network topology view [column 16, lines 24-34]. A user may select elements in the network topology view for expansion [column 18, lines 5-19]. A group expansion mechanism associated with each element may be selected [column 24, lines 13-34]. A group view control mechanism is displayed in response to selecting a group expansion mechanism [column 26, lines 29-41]. The group view control mechanism provides different levels of group expansion for selection [column 26, lines 42-48, column 27, lines 7-19; figure 10].

Gauvin does not expressly teach a method comprising... displaying, responsive to selecting said interactive connector icon, a pop-up window showing a multiple link connector (MLC) list, wherein each row of said MLC list shows an association between one of the outside link bundles and a corresponding one of the outside node groups, each outside link bundle comprising one or more direct connections.

Similar subject matter is disclosed in independent claim 13.

Regarding independent claim 16, Gauvin does not expressly teach a pop-up window displaying said MLC list responsive to selecting said button, wherein each row in said MLC list displays an association between one of said outside link bundles and one of said groups of outside network devices to which said network device connects, each of said one of said outside link bundles comprising a plurality of direct connections between the network device and a respective one of said groups of outside network devices.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
